CalFed*

Dear Governor Davis:

Please use your office to insure that the CALFED Bay/Delta program concentrates on water efficiency before considering new dams or reservoirs. Dams flood valuable habitat and remove water from our rivers. I am unwilling to pay for more dams, but I would pay for an effective program of water conservation.

I am also willing to pay for any effort of CALFED to protect and restore our rivers, bays and fisheries. They are our life blood and they have been seriously compromised by heedless usage.

It is too late for "agribusiness as usual." I urge you to resist the lobbying of agribusiness for solutions which protect only their profits and promote instead a comprehensive plan to preserve, protect and restore our rivers through CALFED.

Also, please see that pollution limits are strictly enforced.

Sincerely yours,

Lois Robin
